The exclusive power plant of Nautique.

When a rare combination of elements like these come together in a ski boat, it’s sure to provide a waterskiing experience unlike anything before. With a blended carbon fiber and fiberglass construction method that creates the perfect balance of strength and weight, this new icon is lighter than any other ski boat on the market and creates the softest wakes imaginable. Add that to the brand-new MicroTuner® Technology and the new Ski Nautique is the best waterski boat ever created. A new era in 3-event water-skiing is here. For more information or to contact your local dealer, please visit: www.nautique.com

To Be The Best...You Have To Use The Best.

OJ Props and XPC Seal Systems are continuously developing new ways to enhance your performance.

By harnessing the power of cutting edge technologies, OJ Props and XPC Seal Systems deliver superior performance and legendary quality like no other.

The XPC drip-less shaft seals are used widely in the Ski and Wakeboarding industry and perform like no others, providing years of worry-free boating at an economical price. To find out how easy it is to update your boat, check it out at ojprops.com. OJ Props, once again setting the standard for the recreational boat enthusiast.

The XMP Edge is the first propeller in our industry designed specifically for the V-drive wakeboard boat to satisfy the hardcore wakeboarders, skiers and slalom skiers. This propeller concept has been copied but there is no comparison to the original creation of the XMP Edge and it's unrivaled performance.

12-TIME WATER SKI WORLD RECORD HOLDER
The 2019 Malibu Response TXi

MALIBU OPEN EDITION

The sleek, tournament-ready Response TXi has the latest in Malibu technology and innovations sitting on a tournament-ready hull. With 12 world records under its belt, the performance of the T-Cut Diamond Hull™ on the TXi is undeniable.

Want to get behind the wheel? Make sure to contact your dealer for demo days.

#THETRUTHISONTHEWATER | @MALIBUOATS | MALIBUOATS.COM
The American Water Ski Association approves four towboats – Malibu TXi, MasterCraft ProStar, Ski Nautique, and Nautique 200 – to pull tournaments in 2020

Four competition towboats from three manufacturers have been approved to pull athletes in sanctioned tournaments for the American Water Ski Association, National Collegiate Water Ski Association and USA Adaptive Water Ski & Wake Sports in 2020. The American Water Ski Association, National Collegiate Water Ski Association and USA Adaptive Water Ski & Wake Sports are three of nine sport discipline organizations of USA Water Ski & Wake Sports, the national governing body of organized water skiing in the United States.

Towboats approved for competitions in 2020 are: Malibu Response TXi, MasterCraft ProStar, Ski Nautique, and Nautique 200. Members of AWSA’s Towboat Committee, technical experts, drivers and top water ski athletes conducted this year’s evaluations for AWSA, which were held Sept. 23 at Lake Frideley in Sweetwater, Tenn. The Towboat Committee also worked with two companies to validate new technology that can track the boat’s slalom or jump path and display the results, in real time, to the driver or observer. The technology uses an enhanced version of differential GPS technology known as Real Time Kinematic GPS (RTK GPS) that provides tracking with centimeter accuracy. In addition, one of the RTK companies set up and demonstrated a boat equipped with auto steer (autonomous steering system). The Test Team drove and skied the boat providing feedback and input to the manufacturer.

**SOME IMPORTANT DETAILS TO CONSIDER:**

**MasterCraft Ballast/Weight System – TRICKS ONLY**

The MasterCraft ProStar was tested and approved for use in the Trick event with the use of an additional ballast / weight system as configured by MasterCraft. The ProStar can be used for tricks both: 1) with the ballast / weight system; and 2) without the system.

If the boat is used with the ballast/weight system, it must be configured as it was tested and approved. Specifically, the MasterCraft ballast/fat sack must be installed in the bilge; under the floor compartment which is under the middle seat. The sack must be completely full when used for tricks (no partial fill!). In addition, 75-pound weights as configured by MasterCraft must be installed in each of the rear compartment trays (150 lbs. total). Storage compartment trays are located under the access doors at the stern.

The ProStar is not approved with any other configuration, in other words, a user cannot simply put a ballast / fat sack or weights on the boat floor.

**Nautique Hydrogate – 2018 & EARLIER**

The Nautique Hydrogate can be set in one of two positions, slalom or tricks/jump (may not be set in between modes).

- **Tricks:** The default position is the trick mode. The skier has the option of using the slalom mode. It is the skier’s responsibility to inform the boat crew when choosing the slalom option. The skier may choose to change the setting between passes.
- **Jump:** The default position is the jump mode. The skier has the option of using the slalom mode. It is the skier’s responsibility to inform the boat crew of slalom option prior to leaving the dock. In Class C tournaments only, the skier may choose to change the setting between jumps.
- **Slalom:** The gate will remain in the slalom mode.

**Nautique Hydrogate & MicroTuners – 2019 & LATER**

The Nautique Hydrogate has 11 settings (Zero to Ten – inclusive).

- **Slalom:** The gate will remain in the slalom mode. MicroTuners - There will be NO RE-RIDES for a setting different than requested, as long as the adjustment for the line length is within the Matrix provided by the company. If a rope length is selected that changes the MicroTuner setting (for example the proper rope length should have had the MicroTuners deployed and the chosen length did not deploy them), then a reride will be allowed. If a complete pass was made, there will be no reride.
- **Tricks:** The Trick Hydrogate will be 0 to 10. The default setting is Trick mode (10). The Hydrogate may be adjusted to a setting from 0 to 10 of Slalom (0), Middle 1 to 9 or Trick mode (10). The skier may choose to...
change the setting between passes.

- Jump: The Jump Hydrogate will be 0 to 10. The default setting is Jump mode (10). The Hydrogate may be adjusted to a setting of Slalom (0), Middle 1 to 9 or Jump mode 10. It is the skier’s responsibility to inform the boat crew his Hydrogate setting prior to leaving the dock. It will remain in that position for his/her turn.

**Ski Nautique Ballast System**  
**TRICKS ONLY • 2019 & LATER**

If equipped, the ballast system starting level may be chosen by the skier (0%, 25%, 50%, 75%, or 100%). The skier may select +/- 50% for his second pass based on his first pass selection. The LOC along with the CJ may set a maximum upper ballast level. If so, the skier may not exceed that limit when selecting a second pass change.

**About The Towboat Evaluations**

In 1983 AWSA established its first set of comprehensive technical evaluations of in-boat and outboard water ski towboats. These procedures have been updated every year since then to take advantage of the most up-to-date technology available.

To have a boat evaluated, a manufacturer must be a USA Water Ski & Wake Sports Gold Corporate Member, and a member of the USA Water Ski & Wake Sports Foundation and Water Sports Industry Association. While successful completion of the towboat evaluations allows a manufacturer to pull tournaments, there are also several other advantages. Private-lake communities continue to be built all over the country. Most developments require any boat used on the lake to be on the AWSA-Approved towboat list. Many city and community-owned lakes also only allow AWSA-Approved towboats on their waterways. Public and private lake communities have the peace of mind knowing these boats have been put through the most rigorous testing in the industry. Approved towboats also carry more value to marine dealers in terms of marketability.

Once a model successfully completes the evaluations, the manufacturer is encouraged to pull skiers at AWSA-sanctioned tournaments. By pulling a predetermined number of sanctioned tournaments at various levels of competition, a manufacturer’s towboat model becomes eligible to participate in AWSA’s regional and national championships. Although the Towboat Committee compiles reams of test data for each towboat, it is important to note that this information is confidential and only released to the manufacturer. Currently, the purpose of the evaluations is to determine if a towboat has suitable characteristics for water ski competitions.

Before a boat even hits the water, the test team runs through a detailed check-in procedure. All aspects of a boat are measured, including the overall length, width, fin placement and depth, prop pitch, and shaft angle. Engine and transmission serial numbers are recorded along with technical data from the power package. The boat’s hull characteristics are noted, and pictures of the stern, side, cockpit and interior are taken.

To be used in competition, three-event towboats must meet certain performance standards that are designed to give skiers and drivers optimum conditions during tournament competition. These standards are established by AWSA’s Towboat Committee to achieve tournament-capability status. Each boat must pass a series of 11 tests and sub-tests: power and acceleration, handling and maneuverability, engine/prop combination, dredgability, sound level, slalom course center-line deviation, slalom spray, jump course center-line deviation, and slalom, tricks and jump wake evaluations.

**Power and Acceleration**

The object of the test is to determine whether a boat has adequate power to pull slalom and jumping events. The distance required to pull a skier from a deep-water start on a competition slalom ski and accelerate to 36 mph is measured. This distance must not exceed 250 feet for Class C tournaments. Record capability (R) tournament boats must achieve 36 mph within 230 feet. Deep-water starts are simulated with a test drone, designed to provide a pull equal to that of a 180-pound slalom skier. Use of a drone insures consistency in testing. GPS Systems and radar guns are used to measure distance to speed, while the corresponding software provides exact measurements as well as graphical representations of acceleration testing. This is especially helpful for manufacturers testing different engine and/or propeller combinations. After successfully completing the power and acceleration phase, the power also will be tested in subsequent slalom and jump centerline deviation tests. Drivers constantly observe a boat’s power while pulling skiers under simulated tournament conditions.

**Slalom & Jump Course Centerline Deviation**

This test measures the amount of boat path deviation from the pull of slalom skiers and jumpers. A boat’s ability to track well is paramount in order for the driver to provide a straight pull, whether a skier is ripping up the slalom course at short line or running for a 200-foot jump. Measurements are taken via end course video units that provide feedback to a computer. Tracking targets are strapped to the pylons and on the front of the windshield to follow the boat and allow the test team to easily spot excessive tracking problems. The computer measures the exact lateral movements of the boat during each pass through the slalom and jump courses. Data, including the maximum deviation, is recorded for multiple slaloms at both 34.2 mph and 36 mph; and at jump speeds of 31.7, 33.6 and 35.4 mph. For a boat to pass, the average must be less than 0.4 feet (4.8 inches) for slalom, and 0.8 feet (9.6 inches) for jump. Test team members rotate through the cockpit allowing several drivers to evaluate the tracking.

**Wake Evaluations**

While centerline deviations are being measured, skiers are evaluating the boat’s wake characteristics and the effect they have on the skier. Slalom skiers evaluate wake size, hardeness, rooster tail, and the amount of spray for each propulsion combination (engine and/or prop). Using a numbering system, skiers are independently interviewed, and they rate the wake at several line lengths and speeds. Jumpers also are looking at the effect a boat’s wake has on the counter cut and approach to the ramp. Wake height and hardness are rated on a similar numbering system based on the effect the wake has on the skier at several speeds. Separate testing is done to evaluate each boat’s tricks wake. Tricks skiers look at the wake table, turbulence, height/width, and definition and symmetry, and then they rate each wake accordingly. Upon reviewing the skiers’ scores from all the wake evaluations, the test team looks for patterns of poor scores and negative skier feedback. Although the scores are subjective, a pattern of poor scores can cause a boat to be further evaluated and/or failed.

**Handling and Maneuverability**

Each boat is driven through a figure-eight course with a circle diameter of 75 feet. Passes are made at 17 and 26 mph in both directions. The boat is then required to make 180-degree turns at 36 mph within the 150-foot diameter course. This test ensures all maneuvers can be made safely and under control. All phases of this test must be passed for a boat to continue testing.

**Sound Level Testing**

Three-event boats must not produce more than 75 decibels of sound while passing through the slalom course at 34.2 and 36 mph. Sound levels are recorded through a sound meter at a distance of 125 feet from the course centerline with readings taken in each direction. The purpose of this test is to make sure these boats are not in violation of generally accepted maximum noise level standards.

**Dredgability and Engineering**

While conducting all phases of testing, drivers are evaluating the boat’s combination of power package, design characteristics, controls and instrumentation. These combinations should allow drivers to provide smooth, consistent pulls within record capability tolerances. Test team members also are looking at each boat’s design, whether it will hinder the performance of skiers and officials, and if any obvious safety hazards are present. Comments are recorded on each of these issues with serious deficiencies noted.

The 3 Events of Competition Water Skiing

SLALOM COURSE & ROPE LENGTH

ABOUT:
SLALOM SKIERS must go through the gates (2 red buoys at each end of the course) and then ski around all 6 red buoys without missing one or falling. This is called a pass. Starting in 2018 the mini-course has been added. The skier must cut to where on a skiers first pass, if they cannot make it outside the red buoys, they can ski around the green buoys for partial credit. Minimum starting speed is 15.5 mph for both men and women. Women have a maximum speed of 34 mph and the men go 36 mph.

After a skier completes a successful pass, he/she can choose to either shorten the rope or increase the speed up to their division maximum. The shorter the rope, the harder it is to complete!

Eventually it gets too hard and the skier cannot make all 6 buoys and misses or falls, ending their turn. The skiers with the MOST buoys at the shortest length wins.

TRICK & JUMP BASICS

ROPE LENGTH:

| 75° 0° off or 23 meters | 15° off or 18.25 meters 60 total feet | 22° Off or 16 meters 53 total feet | 28° Off or 14.25 meters 47 total feet | 32° Off or 13 meters 45 total feet | 35° Off or 12 meters 40 total feet | 38° Off or 11.25 meters 37 total feet | 39° Off or 10.75 meters 35.5 total feet | 41° Off or 10.25 meters 34 total feet | 43° Off or 9.75 meters 32 total feet |

TRICK BASICS

General Description:
Trick skiers are given two (2) 20 second passes through the trick course, during which the skier performs as many tricks as they are able. Trick passes can be executed on one ski or two skis, (different point values for each equipment choice). Trick skiers are allowed to choose the boat they prefer based on the boats offered by the tournament site. Most skiers have a predetermined trick pass with a specific order of tricks according to their personal preference. All tricks have both a regular and a reverse and the skier can get points for both tricks. A reverse trick must come directly after the regular trick with no more than a 180 degree positioning trick between the regular and the reverse. Each trick has a preassigned point value: one ski tricks score the most, two ski tricks score slightly less.

Your trick run (all tricks done in 20 seconds) is a total of all the different tricks that you do. You cannot repeat a trick for points; each trick can only be scored once for the "regular" and once for the "reverse".

Example of a Beginner Trick Pass:
- Sideslide (90° degree rotation)
- Reverse (Opposite 90° degree rotation)
- Back (180° degree rotation)
- Front (180° degree rotation)
- Reverse back
- Reverse front
- 360 ("0")
- Reverse 360 ("Reverse 0")
- Wakeback (180° degree rotation executed in the air over the boat wake)
- Wakefront (180° degree rotation executed in the air over the boat wake)
- Reverse Wakeback
- Reverse Wakefront

JUMP BASICS

General Description:
Jump Skiers are allowed three attempts at a 5ft ramp (5.5ft or 6ft for select advanced jumpers). A jump is when a skier passes the 180-meter buoy at the beginning of the jump course and successfully skis over the ramp, lands, and skis away without falling. The longest distance landed will be used for placement and point awarding. A jump skier may also pass the ramp on the left side or follow directly behind the boat if they feel they do not want to attempt to go over the ramp. This is termed a pass and counts as one of the three attempts at the ramp. You may not pass on a jump between the boat wake and the right side of the ramp. Jumpers may choose their speed and are welcome to opt into a higher or lower speed, not to exceed 33.4 mph for men and 33.6 mph for women.

Jump Boat Paths:
Collegiate Narrow: Boat path is as close as possible to the right side of the ramp
Collegiate Split: Boat path is 1/2 way between boat guides and ramp
Collegiate Wide: Boat path is to hug the left hand boat guide on the ramp side of the buoy
Narrow Split: Boat path is to hug the left boat guide buoy from inside of the boat guides
Center Split: Boat path is to hug the right hand guide buoy from the inside of the boat guides
Wide Split: Boat path is to hug the right boat guide guide from the inside of the boat guides

Cuts at the Ramp:
Advanced jumpers may want to cut at the ramp to accelerate their speed and increase their distance. The following are different cuts in order of increasing difficulty:
- Ride over: Jumper lines up with the ramp and rides directly over the ramp
- Single Cut: Jumper starts from just outside the left boat wake and cuts through the wall of the ramp
- Double Cut: Jumper starts from outside the right hand boat wake and cuts through the base of the ramp
- 3/4 Cut: Jumper starts from outside the right hand boat wake and cuts through the base of the ramp
How to Enter a Tournament

How do I enter a tournament?

1) You can enter most events online by going to www.usawaterski.org/rankings/view-tournamentshq.asp

2) Or you can send a paper entry (see below) to the tournament registrars

In which division do I ski?

What class of event should I choose?

If you are just starting out or beginning to get comfortable then look for Class C or F. That level of skiing combines those skiers who are new with some good skiers.

IMPORTANT
Please read the information below regarding entry qualifications and procedures for the 2020 GOODE Water Ski National Championships. Meeting entry qualifications and following the necessary procedures will determine whether or not you compete in the tournament. The contestant is responsible for meeting entry qualifications and providing proof of eligibility within the stated time limit.

QUALIFICATION
Entry qualification requirements are available in the AWSA Rulebook at USAWATERSKI.org.

ENTRY AND ENTRY DEADLINE
Online entry submission is required at USAWATERSKI.org. USA Water Ski & Wake Sports must receive entries before Tuesday, July 28, 2020, to avoid penalty. Late entries will be accepted until 5 p.m. on the day prior to the scheduled start of the skier’s first event. Entries submitted on or after the July 28 deadline will include a late fee of $15.00 per 24-hour period or portion thereof. ABSOLUTELY NO ENTRIES WILL BE ACCEPTED AFTER 5 P.M., THE DAY PRIOR TO THE SCHEDULED START OF THE SKIER’S FIRST EVENT.
ABSOlutely NO FAX ENTRIES. If you desire verification of receipt, please refer to the Registration Status Report at USAWATERSKI.org.

ENTRY FEES
1 Event: $165; 2 Events: $200; 3 Events: $235; Family of 3: $430* Family additional entries $80 for each additional family member – Late Entry: $15.00/day
* Each participant must complete online registration.

REGISTRATION
All contestants must register at the National Tournament, either in person, by web registration at USAWATERSKI.org, or through a representative, providing all required proof of qualification and fees no later than one-half hour before the scheduled start of the contestant’s first event. If the skier’s registration on USAWATERSKI.org is incomplete or is NOT shown as qualified and fully paid in the online registration system, then they would need to present themselves at on-site Registration. On-site registration must occur within the allowable hours as listed below.

No competitor will be permitted to ski in the 2020 GOODE Water Ski National Championships tournament unless he or she has signed the Adult/Minor Specific Event Waiver. Signature of parent or guardian is required for a minor entering the tournament.

Registration hours on site will be from 10 a.m. until 5 p.m. on Monday, Aug. 3, 2020; from 45 minutes prior to the start of the first event until 5 p.m. on Tuesday, Aug. 4 through Friday, Aug. 7; and from 45 minutes prior to the start of the first event until 30 minutes prior to the start of the last event on Saturday, Aug. 8.

REFUND POLICY
$35 of the entry fee (per person) is an administration and processing fee and is non-refundable. Late fees are also non-refundable. If you registered for the 2020 GOODE Water Ski National Championships, and are you are unable to participate you must submit a cancellation request to USA Water Ski & Wake Sports in writing or by email to usawaterski@usawaterski.org prior to the start of your first event. If you do not submit a cancellation request, you will not receive a refund. Cancellation requests will be honored due to lack of qualification or medical with documentation provided. All other excuses will be evaluated by the president of AWSA at the time the cancellation notice is received to determine whether or not a refund will be issued. USA Water Ski & Wake Sports will pay refunds within 60 days following the conclusion of Nationals.

New AWSA Mobile App

Now you can enjoy your water skiing experience online anytime from anywhere.

Download the App at: www.usawaterski.org/rankings/mainmenu.m.asp

N 19
AWSA Team Skiing

CONCEPT Each region has teams that compete at the Regional Championship. The top 2 teams will go on to Nationals to compete for the National Team Title. The team championship is NOT a separate event; rather points are accumulated while the teams complete in their individual division/event.

TEAM CONSTRUCT Each team will be comprised of up to 5 men, 5 women, 5 juniors across Slalom, Trick and Jump. Teams can be made up of single eventers, 2 eventers, or overall skiers. The members of the teams do not need to be qualified for regionals, and they do not need to be qualified for nationals. This means that all those members of a winning Regional team can go to nationals.

SCORING The top 4 scores for each event (Slalom, Trick, Jump) for each group (Men, Women, Juniors) will be used for determining the winning Team. The scores will be generated through a point system based on NOPS. Meaning if you have 44 slalom skiers that are participating in a team event, then points will be based on a 10-point increment. Example: the skier that had the highest NOPS point for slalom would receive 440 points, whereas the skier that had the lowest NOPS score would have 10. The top 4 scores for each team in each event would be accumulated to become the team score.

Find out how to make your team by contacting the 2019 Captains and commissioners @ http://www.usawaterski.org/pages/divisions/3event/AWSATeamSkiingCommissioners.htm

Team Skiing Regional Champions History

2019 Eastern – Connecticut; South – Florida; South Central – Central Texas; Midwest – Illinois; West – Northern California
2018 Eastern – Connecticut; South – Florida; South Central – Central Texas; Midwest – Illinois; West – Northern California
2017 Eastern – Connecticut; South – Florida; South Central – Central Texas; Midwest – Illinois; West – Northern California
2016 Eastern – Virginia; South – Florida; South Central – Central Texas; Midwest – Illinois; West – West Region Area 3

Team Skiing National Champions History

2016-2019 Florida

Thanks to fundraising efforts over the last 3 years we have raised over $60,000 to support our USA water ski teams. In 2020 we have the junior worlds and Pan American Championships for all age groups. Every dollar helps, please help fund our teams in 2020. https://www.teamusadonations.com/
Fun Tournament Formats

Hosting an event this year? Add some fun to your tournament!

Here are some different tournament formats that are being used across the country to make tournaments more fun.

1. Pick your Poison
   a. Skiers are seeded from elite to novice and paired up head-to-head in round 1; the one that skis a greater percentage of their average moves to the winner’s bracket and the loser to a “loser’s pool”
   b. Winners of round one pick skiers from the “loser’s pool” to compete with in round two
   c. Once you win two rounds you’re in the finals, once you lose two rounds you’re done for the day. Those who win one round and lose one round will ski a 3rd round prior to the finals with the winners of round 2 picking their competitor from the round 2 “loser’s pool”.

2. Spin It to Win It
   a. Skiers are seeded from elite to novice and divided into 3 groups. The Top 5 skiers, skiing against their average, from each group advance to the Finals.
   b. In the Spin It to Win It Finals, finalists must ski one pass below their average, spinning at each end until they miss
   c. The winner is the skier who runs the most passes.

3. Run the Gamut
   a. Skiers are seeded from elite to novice and then divided into team of approximately 5 skiers with each team having skiers of all ability levels.
   b. Teams ski 2 rounds to determine team seeding for the finals.
   c. In the Finals, each team must run 8 passes in the order of 28 mph -> 30 mph -> 32 mph -> 34 mph -> 36 mph -> 22 off -> 28 off -> 32 off
   d. The team that “runs the gamut” in the shortest amount of time is the winner and all skiers receive points towards that season’s overall competition

4. Survivor
   a. Skiers are seeded from elite to novice and then divided into groups of 4.
   b. The skier with the lowest score against their average each round is “kicked out of the group”.
   c. The final skier standing in each group qualifies for the finals against the winners of the other groups.

5. Head-to-Head
   a. Skiers are seeded from elite to novice and then bracketed “NCAA style”.
   b. Skiers work their way through the double elimination brackets until there is only one skier standing.

6. Plinko Your Challenger
   a. Round one the scorer drops plinko chip to select your challenger
   b. You ski against each other and the winner moves to the winners bracket (top of plinko board) and the loser moves to the bottom of the plinko board
   c. Winners than drop the plinko chip to select whom they will ski against
   d. Winner moves on and rounds continue as a normal head to head format would

7. Toss Your Start (Corn hole toss)
   a. Each round, skier tosses one bean bag and if the skier gets a hole in one they can choose to start at whatever speed or line length they want
   b. A bag on the board means the skier can start two passes below their average
   c. A bag on the grass means the skier has to start one pass below their average

8. Run Off Shoot Out
   a. 3 rounds of slalom competition, 10 skier run off, 4 skiers make the head to head semi-finals, 2 skiers compete in a head to head final.
   b. The 3 rounds were grouped by age, ability, and sometimes speed.
c. Qualifying for the bonus round was determined by the number of buoys over their 12 month average score they skied. If a skier skied better than their average in the first 2 rounds, the higher score became their score to beat.
d. During the 3rd round, skiers used their 12 month average/highest score on the day as a baseline. The top 10 skiers who skied the best comparatively moved on to the 10 skier run off.
e. In the run off, skiers had to start at their best successful full pass (like an actual runoff). The 4 skiers who skied the most buoys move on to a head to head semi-final.
f. The winners of the semi-final go up against each other head to head in the final round.

9. Ability Based Events
   a. Skiers are placed in ability groups based on an average buoy count taken from previous tournaments
   b. As skiers improve, they move up into new ability divisions and compete against skiers in their new ability level.
c. At the next tournament, skiers are placed into their new ability level if they skied above their average at the previous tournament, allowing for new potential competitors each weekend.
d. Chart below is an example of what ability groups they use in the Michigan Ability Series

10. Shoot Out
    a. A 1 round tournament is held to determine the 16 skiers who skied the best based on their average.
b. These 16 go head to head with a handicap from the rankings list
   i. If skier 1 has a ranking score of 41 off 36mph that is the wall pass
   ii. If skier 2 has a ranking score of 38 off 34 mph, that is their wall pass
   iii. Skier 1 would go off the dock at 35 off 36mph
   iv. A score of 3 at 35 off for skier 2 (his 3rd pass) would beat a score of 2 at 39 off for skier 1 (his 3rd pass)
c. The higher seeded skier would pick who would ski first. The head to head continues as skiers are eliminated.
d. The final round can be skied as skier 1 pass 1, skier 2 pass 1, skier 1 pass 2 and so on.

11. Green Lightening Team Bracketed Handicapped Tournament
    a. A team consists of enough skiers to have 4 skiers in each event (S, T and J)
b. Each skiers average is calculated from the rankings list before the tournament.
c. Skiers are put into a head to head bracket march madness based on ability/average
d. Scores below average are scored as a percentage of their average, Scores above average are scored as a plus/minus.
   i. Skier 1’s average is 57 buoys, Skier 2’s average is 120.
   ii. Skier 1 skied 55 buoys (96%) and skier 2 skied 118 (98%) skier 2 moves on.
   iii. Skier 1 skied 58 buoys (+1) and skier 2 skied 118 (98%) skier 1 moves on.
   iv. Since skier 1 skied above average, they have a new average calculated by old average score and new score.
e. Team points are also awarded per round for each skier. Round 1 is 2 points, round 2 is 4 points and so on.
f. There is also a team winner at the end of the tournament.
g. An additional set amount of team points will be awarded to the team with the most team spirit/costumes.
h. There is an obstacle course on Saturday night for all teams. Different challenges are picked each year (catching marshmallows in your mouth, flip cup, math facts after spinning on a bat, cartwheels, etc)
AWSA Rule Update: Slalom Mini Course

At the 2018 January board meeting the AWSA board of directors approved the use of a mini course within the slalom event. The following details should help explain the rule change as well as how the system will be scored. The introduction of the mini course will provide a great learning tool for athletes trying to learn the big slalom course.

- Optional for LOC in 2018 in class C and F events.
- Mini course green buoys should be set at 7.5M plus/minus 1.1 meters (8.5m ideal).

- Each mini course buoy is worth 1/2 a buoy.
  - To get credit for 1/2 the skier must round the mini course buoy and then cross the boat guide line closest to the buoy, just like when full credit is achieved on the full course. No partial credit for mini course buoys.
  - This does not change partial scoring for regular buoys.
- In class C, mini course scoring will only be used on pass #1 and a skier must make 6 full buoys to get a second pass.
- In class F many other options and chances may apply.
- A mixture of mini course buoys and full course buoys can be used to attain a final score.
  - This mixture must be of consecutive buoys, once a buoy is missed (both mini and regular) no more buoys are counted in the final score.

Another alternative to the mini course in class F is to drive the boat in between the boat guides and skier balls.
Alternative Mini Course Options

CAWSC / CASS Mini-Course Rules

General Rules:

1. CAWSC and CASS allow for two divisions for Mini-Course Skiers
2. There will be 1 Judge. This Judge will be in the boat and score each skier.
3. Skiers are NOT dropped after each pass.
4. The skier receives a free fall or miss.
5. The skier continues until they have attempted/completed 4 passes.

2 Ski Mini-Course Division and 1-Ski Mini-Course Division

1. The 2-ski Mini-Course Skier’s skis may be separate or joined together at the front and or the back. They score the same.
2. The 1-ski Mini-Course Skier may start on 2 skis and drop a ski to gain 1-Ski status.
3. Skiers can start at any even-numbered speed (12, 14, 16, 18mph, etc).
4. Speed increases by 2 MPH for each successful pass. The top speed for the 2-ski division is 26 mph.
5. When the 2-ski Mini-Course skis completes the 26 mph pass. The Skier will bump into the 1-ski Mini-Course division.
6. When the 1-ski Mini-Course skis completes the 26 mph pass. The Skier will bump into the 1-ski No Gates Novice Slalom Division.

Mini-Course Scoring:

1. The ski (s) must be completely outside of the red/yellow buoys.
2. The 2-Ski Mini-Course skier scores 1 point for each consecutive buoy.
3. The 1-Ski Mini-Course skier scores 2 points for each consecutive buoy.

Australian Mini Course Point System

2) An 18.25m rope length is used (there are no rope shortenings)
3) The skier chooses a comfortable start speed
4) The maximum boat speed for any Mini Course skier will be 32mph
5) Skier shall enter through the gates and ski around each successive mini-course buoy and out the gates as per normal to continue scoring. Skiing wide of Mini Course buoys towards or around full course buoys is to be encouraged and will earn additional points.
6) The skiers round ends at maximum 4 passes, when a mini course buoy is missed or gates are missed.
7) At the discretion of the Boat driver and Boat judge, slow skiers can be spun just outside the 55m buoys without detriment to their run. A maximum of six minutes will be allocated for each mini course competitor. If, in the opinion of the Boat driver, this will be exceeded, the boat shall return to the dock without completion of any remaining passes.
8) For their first two tournaments only, skiers shall be granted up to 3 starts, after which they will forfeit their turn.
9) Score 1 point for rounding each mini course buoy, 2 points if they are deemed closer to the main course buoy or 3 points if they round the main course buoy. There are no half points awarded. The score is the points scored for the number of buoys rounded until a buoy is missed; there are no bonus buoys awarded in Mini Course for speeds below that attempted.
10) As a minimum, mini course judging can be completed from the boat only.
12) If the skier successfully completes the main course in two tournaments, they will be deemed as having graduated to main course skiing. This move is compulsory. The "Graduation" should be recognized at the tournament presentation.
Your First Ski Tournament?

Emotions are high, and the thrill of competition is energizing everybody. It’s hard to tell who’s more excited ... parents or the young competitors. What can you expect at your first water ski tournament? Here are some tips to make it a great experience.

Show up early. Juniors are often the first classes to ski, and both you and your skier will have butterflies. Don’t cut it close on time.

Study the course and site. Make sure your skier knows where to start, where to drop, where the starting buoys are etc. Speak with a tournament organizer if you need help or have questions.

Stay in the know. Check in with the tournament organizers. Weather and a variety of other things can cause last-minute changes to schedules, running orders, and starting locations... don’t get surprised by these.

Know the Rules. Parents are allowed to be the skier’s “designated representative,” and as such can be the skier’s voice on all official matters. One coach can ride in the boat in the tricks event, request changes in speed or boat path, rerides, and a variety of other things as their kids’ coach/advocate. So knowledge of the rules is critical.

Be ready to ski. Have all equipment at the starting dock well in advance. Searching for lost gloves could ruin your mental edge.

Have everything you need. Bring all equipment, towels, sunscreen, snacks and drinks, dry clothes, first aid supplies, sunscreen, etc. Yes, it can fill up an SUV...but you don’t want to be running to a store half an hour away for something forgotten.

Ski too! Water skiing is a family sport with some 15 different age divisions for each gender, not to mention skill-based divisions as well. There’s no reason for mom & dad not to get wet too!

Help out! Regardless of your experience level, there is ALWAYS a way for you to help the sponsoring club. Many “official” positions do not require a judge’s rating (USA Waterski Active membership is required). Dock starters, safety swimmers, and scoring assistants are always in need. There’s no better way to make new ski buddies.

Hang out at the dock. Don’t just ski and leave. Much can be learned from fellow competitors and milling around the dock.

Ask questions. Much can be learned from other parents and contestants at the site. Most are more than willing to share.

SMILE! After all... you’re with folks who, like you, share a passion for waterskiing ...What could be better?

See how you rank? Once you compete in an event you can see how you rank nationally @ http://www.usawaterski.org

Where 2 Water Ski?

Want to be a waterski ambassador? Or need help finding a place to ski. AWSA and Ball of Spray have teamed up to start https://where2waterski.com/. Check it out!

Personal Best Stickers?

Collect personal best stickers to put on your skis and helmets. Over 1000 PB stickers were claimed in the last 2 years. Download the AWSA APP, check your scores, the APP will display your PB’s, click a button to redeem your PB Stickers.
Virtual Slalom APP (VSS)

Don’t have a course, don’t worry. Have a course and want a new way to compete, try the new Virtual Slalom Waterski App on I-Tunes. The new mobile app will allow a player to film themselves skiing on or off a ski course, get a ski score and get a world ranking. The player can be on any kind of ride – one ski, two skis, kneeboard or even no skis.

We want to thank all those that have downloaded the iOS version of the VSS app, played it and given us your feedback. We are building some new features as we speak and hope to launch them by May 1, 2019. Also, we hope to have the Android version of the VSS app ready at the same time. If you have an Apple phone, go ahead and download the app now so you are prepared and will get the updates as they come online. If you have an Android phone, please sign up at our website www.virtualslalomskiing.com to get notified of its release in the app store, when available.

Real-Time Coaching --- One exciting new feature will be real-time coaching. You will be able to film yourself skiing with the app and request a coach quickly. The coach will review your video with you, and you will be able to keep the coaching session in your library.

Team Play --- You will be able to make a team of your best friends. Your team can then play amongst themselves using handicapped scoring system, or you can challenge other teams to real-time competitions...for major bragging rights when you win. Each player will get a PAR score which will be the average of their top 5 scores on the app. This will be used for handicapping skiers of different levels. You will still be able to play in regular competition mode as well.

More Leaderboards --- We will be adding more leaderboards including age groups, gender, state, country, and team leaderboards. You will get even more rankings and ways to measure your skills and compete.
2020

Grassroots Tournament List

This is only a partial listing of GrassRoots Series events taking place in 2020. For complete and up to date listings, visit USAWATERSKI.org and click on the “Events & Registration” link on the left-side menu.

USA Water Ski & Wake Sports is inviting our affiliated ski clubs to host free learn to ski events during the week of June 27 - July 3. USA Water Ski & Wake Sports is covering the cost of sanctioning and guest memberships for all affiliated ski clubs who participate in Get on the Water Week! The week coincides with the anniversary of Ralph Samuelson being the first to successfully water ski on July 2, 1922.

Get on the Water Week provides local ski clubs with a national platform and the opportunity to connect with your community to find new skiers to keep our sport alive and thriving.

As presenting sponsor, Radar Skis will provide a customized learn to ski kit, including either trainer or combo water skis, two life vests and a rope to the first 20 clubs that register.

Ski Club Requirements:

- Affiliated USA-WSWS Club
- Choose any date between June 27 – July 3, 2020 that works best for your club to host a Basic Skills clinic.
- Volunteers for marketing, recruitment, check-in, certified instructor, safety, and driver(s).
- Provide boats, fuel, flotation and basic ski equipment.

USA Water Ski & Wake Sports Will Provide:

- USA Water Ski & Wake Sports Basic Skills sanctioning free of charge
- Guest Memberships for all registered participants free of charge
- Basic Skills clinic guidelines
- Online registration platform
- Promotional tools
- National marketing
- Get on the Water shirts & giveaways

Key Dates:

Mid-April: Promotional materials arrive via email. Start marketing your event!
Mid-June: Promotional shirts and giveaways arrive.
June 27 - July 3: Celebrate Get on the Water Week!

For more information and to register, visit sharelifeonthewater.com/gotw-info.html

Or use your smart phone camera app to scan this code:

A special Thank you to our Get on the Water Week sponsors!
Come and watch the best skiers in the U.S.A. compete at night!

2020
A message from your EVP

Hi Everyone, and happy new ski year. Having just completed my first full year as your EVP I would like to thank you for the privilege of serving you in this capacity. I would also like to thank those of you who have shared your thoughts and ideas on how to grow our sport and keep it fresh. Our membership numbers are up slightly over last year, and your help is needed to keep this trend moving in the right direction. Continuing this positive growth will require exploring new and innovative ways to engage more people to participate in competitive water skiing. Please share your ideas on this topic with your Regional Councilperson. If we work together, this sport that we love so much will continue growing.

We are pleased to announce that Broadside Harbor in Caldwell, ID will be hosting the 2020 Western Regional Championships. Your hosts to this year’s tournament are working very hard to make this an exciting event. I hope to see you there. The ski club of the Palm Beaches will once again be hosting the National championship at Okeeheelee Park in West Palm Beach, FL. There are plenty of opportunities to ski and work at these events so make your plans now!

There are no shortages of opportunities for you to join in this year. Local organizing clubs (LOCs) throughout the Western Region are hosting over 130 tournaments at sites near you. There will be several junior development camps throughout the region and two Best of the West camps. Connie Bergmark, our regional commissioner for team skiing is making plans now on ways to increase the friendly competition between the Areas within our Region. As in the past we will be fielding 4 teams that will compete at the regionals. The top two winners will advance to represent the West at the National championships. We are also expanding the age divisions in competition this year to include Boys and Girls 1 through 5 (see the AWSA rulebook for more details on this).

When you add it all up 2020 promises to be a great year for competitive water skiing. We are fortunate to be a part of this great community of people. So, gather your family and invite your friends to join us. I am confident that we can make this the best year ever for our region. I’ll see you on the water!!

Brad Corbin - West EVP

John Maitland    Brad Walters

Best of the West Team Selection

The West Region "Best of the West" team recognizes the top Boys 3-5, Girls 3-5 skiers in the Western Region. The goal of the Best of the West program is to develop the depth and skills of our junior skiers in the Western Region. The Best of the West Team is selected annually and the team consists of 16 members this year.

These skiers are selected through a process that considers NOPS scores from the prior twelve months in the Skier Standings list maintained by the USA-WS, Regional Placement and participation in the prior year's Western Regionals. Second year and later Boys 3 and Girls 3 and Boys 4 and Girls 4 and Boys 5 and Girls 5 are eligible for the team. Overall scores have the highest priority, Regional Tournament participation and overall winners, and finally standings list event placement are additional factors.

Team members are invited to attend one of two planned Western Region Best of the West Water Ski Development Camps during the month of June. Team members are coached by competent, recognized high level coaches. Camps are being scheduled in Northern California and Idaho with the Northern California camp being a larger group this year, which allows all Team Members the opportunity to attend a camp.

Ron Phelps
MB Slalom, Trick and Overall

Please email all 2020 regionals winner photos to Ty Vaio at tyvaio@gmail.com before January 1, 2021.
The Western Region Merit Award
Previously the Rich Slingerland Award of Merit

Every year since 1975 the Western Region has recognized a member or an official who epitomized friendship, dedication and integrity. The first award was presented at the US National tournament and is now one of the Western Region’s most prestigious honors. This award was established and is maintained for a deserving person who might otherwise go unnoticed. All Western Region members are welcome & encouraged to submit nominations for this award to their local councilperson or to Larry Laughlin prior to the Regional tournament.

Outstanding Official
Western Regional Water Ski Championships
Previously the Don Koppert Award

This honor is presented at the Western Regional Water Ski Championships each year to an official who has shown to be extremely hard working and dedicated. Other officials volunteering at the tournament make the selection.

Records Information

- Regional Tournament Record
- Best of the West Records
- Pacific Area Records
- Pacific Northwest Area Records
- Rocky Mountain Area Records
- Hawaii & Alaska Area Records
- Application for Area Record

Submitting Area Records for Approval

A record performance will be considered for approval ONLY if your application is complete and sent (postmarked) within 30 days of the date of performance to:

Amy Scharpf 2510 Curlew Circle Anchorage, Alaska 99502

The completion and submission of the application form is the skier’s responsibility. A $10 donation to “Junior Development”, c/o Russ Selsor, 6778 Velvet Meadow Ct, San Jose, 95120, is optional and greatly appreciated.
2020 APPLICATION FOR AREA RECORD

For area records only. Records set at Western Regional Championships are taken directly from the scorebook and do not require an application. Best of the West Records are taken from approved Area records and Western Regional Tournament Records. Use a separate application for each event and tournament. A record performance will be considered for approval only if this application is complete and sent (postmarked) within 30 days of the date of performance to Amy Scharpf, 2510 Curlow Cir, Anchorage, AK 99502. Or email at stobsco@aol.com. The completion and submission of this form is the skier’s responsibility. A $10 donation for Jr Development, written out to “USA Water Ski”, to Russ Selsor, 6778 Velvet Meadow Ct, San Jose, CA 95120 is optional but greatly appreciated.

APPLICANT COMPLETES THIS SECTION
